

Task Title: Personal Portfolio Website

Task Description:

Create a personal portfolio website that showcases your projects, skills, and a contact form. The website should be visually appealing, fully responsive, and include interactive elements for a better user experience.

Objective:

Develop a portfolio website that highlights personal projects, technical skills, and contact details in an engaging and professional manner.

Implementation Steps:

✓ Design & Development

- Create a visually appealing UI using HTML, CSS, and JavaScript.
- Ensure a fully responsive design for different screen sizes (mobile, tablet, desktop).
- Add interactive elements like animations, modals, and form validations.

Evaluation Criteria:

- ✓ Clean and well-structured code.
- ✓ Responsiveness across multiple devices.
- ✓ High-quality UI/UX design.
- ✓ Functional and interactive features.

Submission Format:

- Upload the project files to GitHub / Google Drive and share the link.
- Provide a brief documentation file explaining features, technologies used, and any challenges faced.

Additional Notes:

- Creativity and originality in design will be appreciated.
- Ensure the contact form has proper validation and sends data correctly.
