

Internship Task: Document Sharing Website

Task Name:

Document Sharing Website

Duration:

10 Days

Task Description:

The task is to design and develop a simple and user-friendly document-sharing website. Users should be able to upload documents, view uploaded files, and download shared documents. The website should be responsive and include a clean, intuitive interface.

Objectives:

- Build a responsive website for document sharing.
 - Include features for uploading, viewing, and downloading files.
 - Implement basic validation and interactive design elements.
 - Use GitHub for version control to track progress.
-

Features to Implement:

1. Homepage:

- Introduce the purpose of the website.
- Provide navigation links to key sections (Upload, Browse, Contact).

2. Document Upload Section:

- Allow users to upload documents (e.g., PDFs, Word files).
- Include form fields for:
 - File selection.
 - Title or description of the document.
 - Upload button.

- Validate file type and size.
 - 3. Document Browsing Section:
 - Display a list of uploaded documents with details:
 - Title/Description.
 - Upload date.
 - Download button.
 - Include a search bar or filter to find specific documents.
 - 4. Document Download Functionality:
 - Enable users to download any document by clicking a download button.
 - 5. Responsive Design:
 - Ensure the layout is optimized for mobile, tablet, and desktop devices.
 - 6. Optional Enhancements:
 - Add user authentication for uploading and accessing documents.
 - Create categories or tags for organizing documents.
 - Display the number of downloads per document.
-

Technology Stack:

- Frontend:
 - HTML5
 - CSS3 (use frameworks like Bootstrap or Tailwind CSS for styling and responsiveness)
 - JavaScript
 - Backend (Optional):
 - Node.js/Express.js or PHP for handling file uploads and storage.
 - Database (Optional):
 - Use MySQL or MongoDB to store document metadata.
-

Version Control:

- Students must create a repository on GitHub.
- Commit changes regularly (with meaningful commit messages).

- Push the final project code to the GitHub repository.
-

Presentation:

- Deploy the project using platforms like GitHub Pages, Netlify, or Vercel.
 - Prepare a brief presentation/demo (5-10 minutes) explaining:
 - Features of the website and functionality.
 - Challenges faced and solutions applied.
 - Ideas for future improvements or additional features.
-

Deliverables:

1. A fully functional and responsive document-sharing website.
 2. Source code pushed to the GitHub repository.
 3. Link to the deployed website.
 4. Documentation (README file) containing:
 - Project Overview.
 - Instructions to run the project.
 - Technologies used.
-

Task Evaluation Criteria:

1. Design Quality: UI/UX, responsiveness, and overall appearance. (30%)
 2. Functionality: Document upload, browsing, and download features. (30%)
 3. Code Quality: Clean, readable, and well-structured code. (20%)
 4. GitHub Usage: Proper commits and repository structure. (10%)
 5. Presentation/Demo: Clear explanation of work and project deployment. (10%)
-

Tools and Resources:

- Code Editors: VS Code, Sublime Text, etc.
- Version Control: Git and GitHub
- CSS Frameworks: Tailwind CSS, Bootstrap

- **Deployment Platforms:** GitHub Pages, Netlify, Vercel
 - **Backend Tools (Optional):** Node.js, PHP
-

Deadline:

The task must be submitted within 10 days from the date of assignment.
